

EU Strategy for the Adriatic and Ionian Region **EUSAIR**

European Commission, DG Regional and Urban Policy

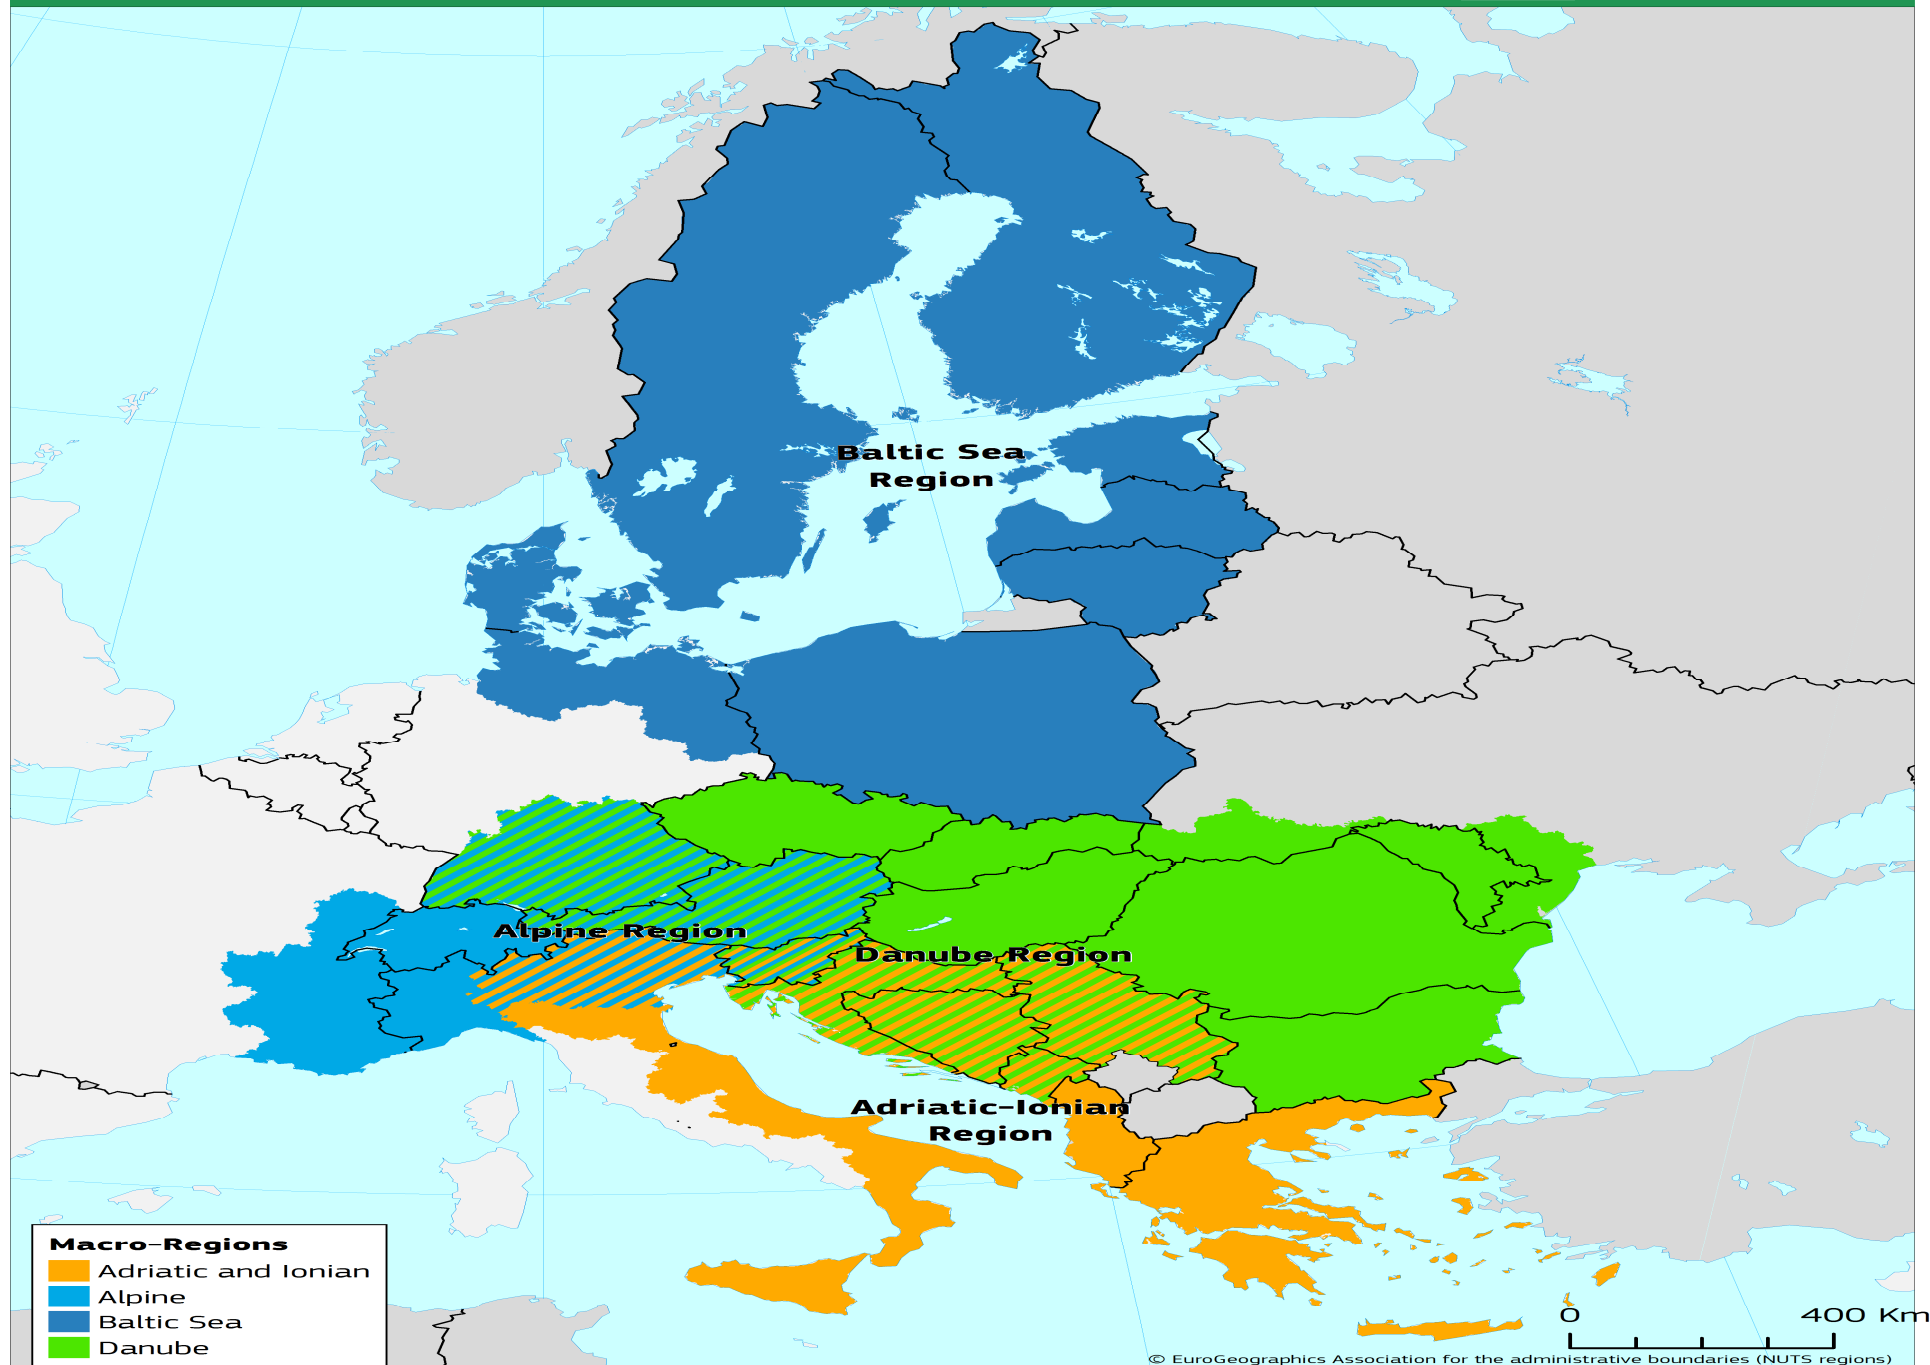

EU Macro-regional strategies – Definition

An integrated framework, endorsed by the European Council, relating to member states and non-EU countries in the same geographical area, in order to address common challenges and to benefit from strengthened cooperation, to contribute to the economic, social and territorial cohesion of the EU, therefore supporting the achievement of EU objectives and in particular the promotion of growth and jobs

Macro-Regions: Adriatic and Ionian, Alpine, Baltic, Danube

European
Commission

EU Macro-regional strategies – principles

- No new EU funds: optimal use of existing resources
- No additional EU formal structures: better use of existing institutions
- No new EU legislation: enhance implementation of existing legislation

Governance of macro-regional strategies

[Commission Report COM(2014) 284 final of 20.5.2014]

Governance involves three fundamental levels:

- Political leadership and ownership (Ministerial meetings)
- Coordination (eg. EUSAIR Governing Board)
- Implementation (eg. EUSAIR Thematic Steering Groups)

In addition, stakeholders (civil society, regional organisations, social and economic partners, etc.) shall be involved in all steps of the Strategy's implementation

EU Strategy for the Adriatic and Ionian Region (EUSAIR)

- Requested by the European Council of December 2012 (to be prepared by the Commission by end-2014)
- Adopted by the Commission on 17 June 2014 [COM(2014) 357]
- Endorsed by European Council of 23-24 October 2014
- Builds on the intergovernmental Adriatic-Ionian Initiative, which cover 8 countries: 4 EU Member States (GR, HR, IT, SI) and 4 (potential) candidate countries (AL, BA, ME, RS)
- It remains open to other partners in the Region (Commission Communication of 17 June 2014))

Regional
Policy

EU Strategy for the Adriatic and Ionian Region (EUSAIR) - Objective

The general objective is twofold:

- Promote sustainable economic and social prosperity in the Region through growth and jobs creation
- Foster integration of participating Western Balkan (potential) candidate countries in the EU

Thematic scope of the Strategy

Pillar 1

Pillar 2

Pillar 3

Pillar 4

Cross-cutting aspects

Capacity building - including communication, Research and Innovation and SME development

Horizontal principles

Climate change mitigation and adaptation & disaster risk management

1. Blue Growth (GR + ME)

Driving innovative maritime and marine growth in the Region by promoting sustainable economic growth, jobs and business opportunities in the blue economy

Blue technologies

Fisheries
and aquaculture

Maritime and
marine
governance and
services

Blue Growth – Specific objectives

- **Blue Technologies:**
R&D&I and business opportunities in blue economy sectors
(shipbuilding, marine technologies, blue bio-technologies)
- **Fisheries and aquaculture:**
Sustainable seafood production and consumption
- **Maritime and marine governance and services**
Improve sea basin governance and services

Connecting the Region
EUSAIR

2. Connecting the Region (IT + RS)

Improving transport and energy connectivity
in the Region and with rest of Europe

Maritime
transport

Intermodal
connections to
the hinterland

Energy networks

Environmental Quality
EUSAIR

3. Environmental quality (SI + BA)

Addressing environmental quality through cooperation
at the level of the Region

- The marine environment
- a) Threats to coastal and marine biodiversity
 - b) Pollution of the sea

Transnational terrestrial
habitats and biodiversity

Sustainable Tourism
EUSAIR

4. Sustainable tourism (HR + AL)

Developing the full potential of the Region in terms of innovative, sustainable, responsible quality tourism

Diversified tourism offer
(products and services)

Sustainable and responsible
tourism management
(innovation and quality)

EUSAIR Implementation: Funding

All available funds in the Region should contribute to the EUSAIR (i.e. should be aligned with the EUSAIR objectives)

- ü **EU funds:** both those territorially based (ESIF, IPA) managed by countries and regions, and those managed directly by the Commission (HORIZON 2020, COSME, Connecting Europe Facility, etc.) can contribute to implementation
- ü **ADRION** transnational programme 2014-20 (~ € 100 million) will support implementation and governance of the Strategy
- ü **IFI and Western Balkan Investment Framework** should contribute to finance (large) investments and provide support to SMEs
- ü **Private investors** should also contribute to implementing actions which provide a return on investment.

EUSAIR: Opportunities

Opportunities:

- **Blue economy** can make a major contribution to growth and job creation (R&D&I on blue technologies linked to smart specialisation strategies e.g. green ship building, yachting, bio-technologies, underwater robotics)
- **Sustainable seed food production**, increasing the added value of local seafood chains (eg. through R&I platforms, joint market intelligence, etc)
- **Connectivity**: the Adriatic is a natural waterway penetrating deep in the EU. Cheapest sea route from Far East via Suez, making travel distance to markets of Central Europe 3,000 km shorter than via northern ports.
- **Tourism, cultural and natural heritage**: the Region can become a showcase for sustainable, diversified tourism products and services (eg. cruises benefiting local economies, recreational fisheries, etc).

EUSAIR: Challenges

Challenges:

- **Socio-economic disparities in the Region are huge.** GDP per head ranges from 120% to 30% of EU average. Unemployment ranges from 4% to 30%
- **Transport and Energy:** significant infrastructure gaps
- **Environment:** increased human use of the marine and coastal space threatens ecosystems
- **Natural and man-made hazards and risks:** seismic activity, climate change, etc.
- **Refugees and migrants crisis:** as an external shock which has to be factored-in in the Strategy
