# The Pillar 1 and its Topics

Driving innovative maritime and marine growth in the Region by promoting sustainable economic growth, jobs and business opportunities in the blue economy

## Blue technologies

To promote research, innovation and business opportunities in blue economy sectors, by facilitating the brain circulation between research and business communities and increasing their networking and clustering capacity.

## Fisheries and aquaculture

To adapt to sustainable seafood production and consumption, by developing common standards and approaches for strengthening these two sectors and providing a level playing field in the macro-region.

## Maritime and marine governance and services

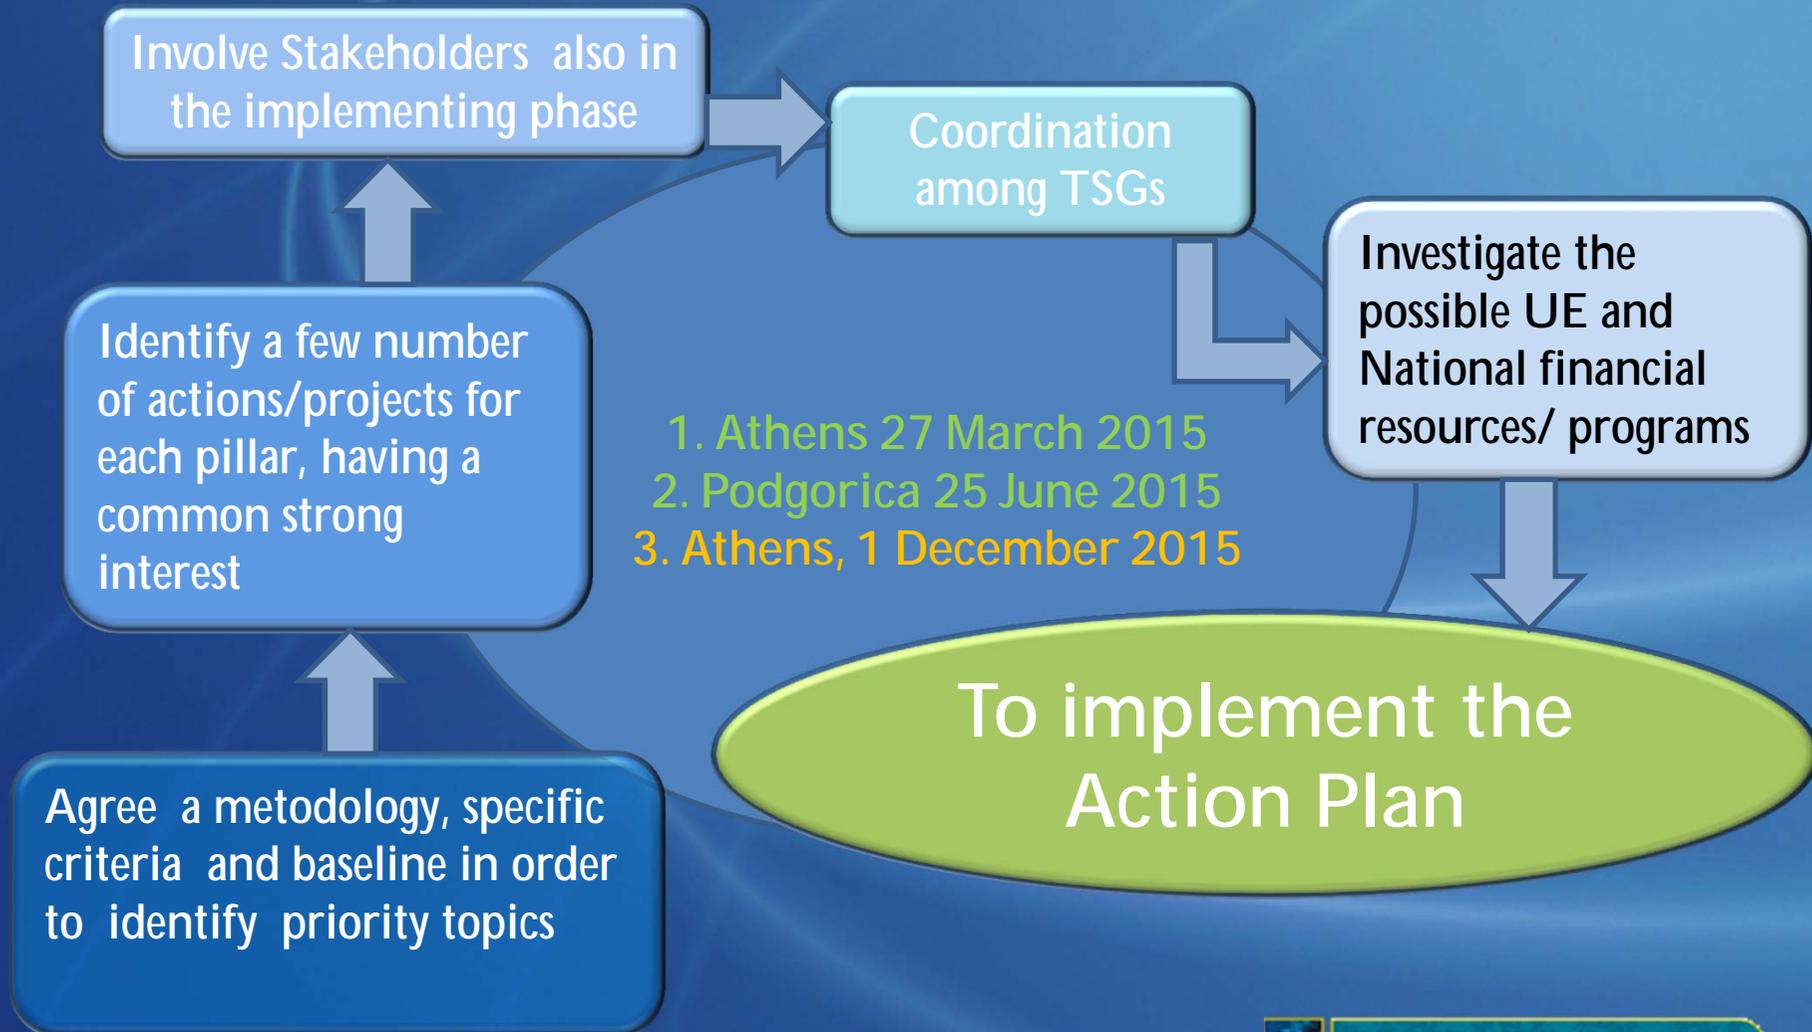

To improve sea basin governance, by enhancing administrative and institutional capacities in the area of maritime governance and services.
